26th October 2015

Dear Sir,

Aircraft modifications

We are instructed by Mr. Ian Simpson the founder of Look-Up.org.uk. Our client believes that your Airbus A320 aircraft have been modified from their original design. We are instructed that this modification takes the form of 3 pipes that now emanate from the rear of the pylon.

We understand that our our client has confirmation from Airbus UK that these pipes are not original to the design of the Airbus A320 aircraft.

We are instructed that the above image is of one of your Airbus aircraft.

We would be grateful if you would confirm the following:

1. Whether these pipes exist on any or all of your Airbus A320 aircraft.
2. Their exact purpose
3. Details of when, where, and by whom they were fitted.
4. Details of the EASA license for modifications

We look forward to hearing from you.

Yours faithfully,

Harrison Grant
